AVT signed second batch of 'OCR For RMG' contract.

July 21

Subsequent to the first batch of 'OCR For RMG(Rail Mounted Gantry) Contract signed last year, Asia Vision Technology had signed another contract of the same with a Korean partner, providing AVT's latest OCR technology on RMGs. 'OCR for RMG' is another 'state of art' product of Asia Vision Technology helping Container Terminals to improve operational efficiency and productivity.

The Inauguration of the Da Chan Bay Quayside OCR & Tally System project.

Sep 1

The Da Chan Bay Quay Side OCR Tally System project progressed successfully as scheduled and the installation of equipment and system for the first of the twelve quay cranes completed and ready to go live in November. AVT Chairman Dr. John Lee, Senior Officials of the Shenzhen Tally Company, the Managing Director of Da Chan Bay Container Terminal officially inaugurated the project.

This project marks another milestone of Asia vision, by providing Quayside OCR & Tally System to help the terminal operator to improve shipside operation efficiency and productivity after the live operation of 8 quay cranes in Xiamen Hairun Container Terminal.

AVT participated the '2016 Security China' at Beijing October 25-8, 2016

The '13th China International Exhibition on Public Safety and Security 2016 (Security China 2016)' was held in China International Exhibition Center in Beijing, P.R. China.

The event was one of the biggest security distribution and procurement center in China. Asia Vision had set up an exhibition booth in the four days event, attracted hundreds of visitors and received numerous inquiries about our product and solutions.
